workforce mPower 2order

Rise of the new workorder: VDI

what is for?

Workforce mPower 2order solution:

- delivers **secure virtual apps and desktops as a service**,

- allows IT to **centrally manage desktop images to streamline management**, reduce costs, and maintain compliance. Virtualized or hosted desktops and applications can be delivered through a single platform to end users. These desktop and application services and virtualized apps can all be **accessed from one unified workspace**.

- provides end users with a **consistently great experience** across devices, locations, media, and connections

- ensures that IT can **consolidate control, automate delivery, and protect user compute resources** through a single, tightly integrated platform

(general description)
